

MANUAL TEST CASES

Healthcare System

Module 1: Patient Registration

Field	Description
Test Case ID	TC_Reg_01
Title	Verify new patient registration with unique ID generation
Preconditions	User is on Registration Page.
Test Steps	1. Enter Name: "John Doe". 2. Enter DOB: "1990-01-01". 3. Enter Contact: "9876543210". 4. Click 'Register'.
Test Data	Name: John Doe
Expected Result	Patient is registered. A unique Patient ID (e.g., P-1001) is generated and displayed.
Actual Result	Registration successful. System generated Patient ID: P-1001. User redirected to profile.
Status	PASS

Field	Description
Test Case ID	TC_Reg_02
Title	Verify mandatory field validation (Emergency Contact)
Preconditions	User is on Registration Page.
Test Steps	1. Fill all details. 2. Leave 'Emergency Contact' blank. 3. Click 'Register'.
Test Data	Emergency Contact: <Blank>
Expected Result	System should block registration. Error " <i>Emergency Contact is mandatory</i> " should appear.
Actual Result	System prevented registration. Error message "Emergency Contact is mandatory" was displayed.
Status	PASS

Module 2: Appointment Scheduling

Field	Description
Test Case ID	TC_Appt_03
Title	Verify booking an appointment for an available slot
Preconditions	Doctor "Dr. Smith" has availability at 10:00 AM.
Test Steps	1. Select Department: "Cardiology". 2. Select Doctor: "Dr. Smith". 3. Select Slot: 10:00 AM. 4. Click 'Confirm Booking'.
Test Data	Slot: 10:00 AM
Expected Result	Appointment confirmed. Status changes to "Scheduled". Slot becomes unavailable for others.
Actual Result	Booking confirmed. Appointment ID #APT-555 generated. Slot 10:00 AM removed from availability list.
Status	PASS

Field	Description
Test Case ID	TC_Appt_04
Title	Verify prevention of double-booking
Preconditions	Slot 10:00 AM is already booked by another patient.
Test Steps	1. Log in as a different patient. 2. Try to book Dr. Smith at 10:00 AM (via URL hacking or race condition).
Test Data	Slot: 10:00 AM
Expected Result	System should show "Slot Unavailable" error.
Actual Result	System displayed "Slot Unavailable. Please choose another time." Double booking prevented.
Status	PASS

Module 3: Doctor and Patient Dashboard

Field	Description
Test Case ID	TC_Dash_05
Title	Verify Doctor's view of upcoming appointments
Preconditions	Doctor is logged in. 3 appointments exist for today.
Test Steps	1. Navigate to Doctor Dashboard. 2. Check 'Today's Schedule' widget.
Test Data	Date: Current Date
Expected Result	Dashboard should list all 3 patients with Name, Time, and Purpose.
Actual Result	Dashboard loaded correctly. All 3 upcoming appointments were visible in chronological order.
Status	PASS

Module 4: Medical Record Management

Field	Description
Test Case ID	TC_Med_06
Title	Verify Doctor can add a prescription to patient record
Preconditions	Doctor is viewing Patient P-1001.
Test Steps	1. Click 'Add Prescription'. 2. Medicine: "Paracetamol". 3. Dosage: "500mg - Twice daily". 4. Click 'Save'.
Test Data	Med: Paracetamol
Expected Result	Prescription is saved to Patient P-1001's history with timestamp and Doctor's name.
Actual Result	Prescription saved successfully. It appeared immediately in the Patient's Medical History timeline.
Status	PASS

Field	Description
Test Case ID	TC_Med_07
Title	Verify Patient cannot edit their own medical records
Preconditions	Logged in as Patient P-1001.
Test Steps	1. View 'Medical History'. 2. Try to click/edit the prescription added by Doctor.
Test Data	NA
Expected Result	Fields should be Read-Only. No 'Edit' or 'Delete' button should be visible.
Actual Result	Medical records were Read-Only. No edit options were available to the patient.
Status	PASS

Module 5: System Security & Access Control (RBAC)

Field	Description
Test Case ID	TC_Sec_08
Title	Verify Horizontal Privilege Escalation (Accessing another patient's data)
Preconditions	Logged in as Patient A (ID: 100). Patient B (ID: 101) exists.
Test Steps	1. Navigate to URL: /patient/profile/100 . 2. Manually change URL ID to /patient/profile/101 . 3. Press Enter.
Test Data	Target ID: 101
Expected Result	System must deny access. Redirect to '403 Forbidden' or Error Page.
Actual Result	System denied access. "You are not authorized to view this page" error displayed. Data protected.
Status	PASS

Field	Description
Test Case ID	TC_Sec_09
Title	Verify automatic logout on window close
Preconditions	User is logged in.
Test Steps	1. Close the browser tab/window without clicking logout. 2. Re-open browser and navigate to Dashboard URL.
Test Data	NA
Expected Result	Session should be terminated or prompt for login again (depending on security policy).
Actual Result	User was asked to log in again. Session did not persist after browser close.
Status	PASS
